

KOÇ UNIVERSITY

COLLEGE of ENGINEERING

Computer Engineering Program Specific Additional Requirements

COMP 291/391 Mandatory Summer Practice I/II

1. Students are required to do their compulsory internship in Computer Engineering subjects defined in the third article under the supervision of a Computer Engineer or an Engineer. COMP 291 compulsory summer internship is done in the summer term at the end of the second year at the earliest.
2. In case the company is eligible in respect of the below rules, the pre-approval of the summer practice coordinator of the current semester is not required.
3. **Major and Double Major Computer Engineering Department students should do their internship in companies with the following structures.**
 - Company Companies that provide services in the basic fields of Computer Engineering and Information Science, such as software companies, data processing centers, hardware manufacturers and data communication companies, or companies that use computer automation, computer-aided design and e-commerce technology in the production process within the Computer-based systems they use for their business focus.
4. Research on Computer Engineering at Koç University is accepted as a compulsory internship with the approval of the internship advisor. In order for research internships conducted outside of Koç University to be accepted as compulsory internship, a request for approval must be submitted via CE Track-it.
5. KUSIS summer practice course opens under the name of summer practice coordinator of current summer semester.
6. Except herein these rules and regulations, students should follow **Summer Practice Procedure** of College of Engineering.

Notes:

- For all administrative questions (regarding social security, application documents, signatures, etc.) please contact Bahar Hısım (bhisim@ku.edu.tr)
- For all academic questions (regarding the content of the internship) please contact the summer practice coordinator of current summer semester.
